	Distributed and/or Sold Primarily Via Retail Channels	Distributed and/or Sold Primarily Via Retail Channels	Distributed and/or Sold Primarily Via Non-Retail Channels	Distributed and/or Sold Primarily Via Non-Retail Channels
Definitions	Commodity Drug Product , that is readily available without a prescription and/or is readily available in retail outlets where regulation permits (does not require medical training to properly use).	Commodity Medical Device , may be sterile or non-sterile, that is readily available without a prescription and/or is readily available in retail outlets where regulation permits (does not require medical training to properly use).	Commodity Drug Product , that is readily available without a prescription and is intended to be dispensed within a Hospital setting (does not require medical training to properly use).	Commodity Medical Device , may be sterile or non-sterile that requires no medical training or a minimum amount of medical training to properly use. Typically purchased in bulk quantities and dispensed in small quantities.
Additional Information	Includes many (or all) low-value commodity items transacted or scanned primarily via Retail channels, where additional data beyond GTIN cannot be scanned or stored by most systems.	Includes many (or all) low-value commodity items transacted or scanned primarily via Retail channels, where additional data beyond GTIN cannot be scanned or stored by most systems.	Includes many (or all) low-value commodity items where highest levels of marking would be impractical, and/or products not typically scanned for those additional markings.	Includes many (or all) low-value consumables where highest levels of marking would be impractical, and/or products that would typically not be scanned for those additional markings.
	Example Products	Example Products	Example Products	Example Products
Example Products	Aspirin (50-count bottle)	Home healthcare Bandages (absorbent, elastic, sterile, etc)	All Pharmaceuticals from Column B (mINIMUM Level of AIDC Marking (Retail) that are intended to be dispensed in a Hospital setting.	All Medical Devices from Column C (mINIMUM Level of AIDC Marking (Retail) that are intended to be dispensed in a Hospital setting, plus the following examples:
	Acetaminophen or ibuprofen (24-count blisterpack)	Home healthcare wheelchairs, walkers, crutches, canes, etc.		Low-value consumables (syringes, syringe caps, hypodermic needles, splints, tape, gauze, bandages, catheter connectors, etc.)
	Antihistamine Nasal sprays, non-prescription	Home healthcare blood pressure gauges (manual, not electronic)		Sample collection containers for sputum, urine, blood products (disposable)
	Antibiotic Ointments, non-prescription	Contact Lens disinfection, re-wetting, and cleansing solutions		Low-value Surgical gowns, masks, gloves, shoe covers, beard covers, head covers, drapes, etc.
	Cough syrups, non-prescription	Patient Exam Gloves		Bedpan (disposable)
	Allergy eye drops, non-prescription	Cotton balls		Disposable oxygen mask and supply tubing
	Saline nasal irrigation spray, non-prescription	Home healthcare IVD tests for cholesterol, pregnancy, etc., not electronic		Tongue Depressor, non-surgical
	After-swim ear drops, non-prescription	Pill Crusher / Cutter		Cotton-tipped swabs or applicators
		Home healthcare wheelchairs, walkers, crutches, canes, etc.		Airway suction tubing and accessories
		Denture adhesive and cleansers		Dental handheld instruments, disposable (picks, mirrors, pliers, probes, etc.)
		Toothbrush (manual or powered)		Blood lancet
		Home healthcare thermometer (manual or electronic)		Low-power binocular loupe
		Ear Irrigation solution and applicator		Orthodontic wire
				Tissue culture dish

AIDC Application Standard: Marking Grids v0.92 (Oct. 23, 2008)

ENHANCED Level of AIDC Marking		HIGHEST Level of AIDC Marking	
Medical Devices Distributed and/or Sold Primarily Via Retail Channels	Medical Devices Distributed and/or Sold Primarily Via Non-Retail Channels	Pharmaceuticals Distributed and/or Sold Via Retail and/or Non-Retail Channels	Medical Devices Distributed and/or Sold Primarily Via Non-Retail Channels
<p>Medical Device, may be sterile or non-sterile, that is readily available with or without a prescription through retail outlets where regulation permits.</p> <p>In general, these products if transacted via the non-retail supply chain would be marked with Enhanced level of markings, but since they transact via Retail channel these additional markings could not be used by typical POS scanner systems.</p>	<p>Medical Device, may be sterile or non-sterile, requiring additional medical training to ensure proper use / administration.</p>	<p>Drug Products requiring special medical training and/or additional special processes to ensure proper use / administration (prescription or legend drugs, clinical trial drugs, controlled substances, vaccines, biologics, therapeutic nutrition).</p> <p>Therapeutic Nutrition includes enteral and/or parenteral nutrition products used to treat patients requiring feeding via that specific route because of a specific disease or to prevent a potential disease.</p>	<p>Complex Medical Devices, Re-Usable Medical Device, and Implants requiring special medical training and/or additional special processes to ensure proper use / administration (implants, surgical equipment, re-processed instruments, software-controlled devices, pacemakers, assets such as infusion pumps, ventilators, monitors, etc.)</p> <p>Note: Implants are NOT required to be direct part marked with AIDC technology to ensure biocompatibility, infection control, and comfort.</p> <p>The Brand Owner should determine if DPM is appropriate.</p>
<p>Includes items where the highest levels of marking would be impractical, and/or products that would typically not be scanned for those additional markings since they are transacted via retail outlets.</p> <p>Includes items used in home health care such as IVD kits and supplies for diagnostics, therapeutic nutrition delivery devices, etc.</p>	<p>Includes many (or all) disposable instruments where an enhanced level of marking would typically be scanned and utilized by trading partners.</p>	<p>Includes many (or all) Pharmaceuticals that are subject to e-Pedigree and/or Track/Trace requirements. The suggested markings are therefore likely to be scanned and utilized by downstream trading partners.</p>	<p>Includes many (or all) complex Medical Devices that are subject to Track/Trace requirements. The suggested markings are therefore likely to be scanned and utilized by downstream trading partners.</p>
Example Products	Example Products	Example Products	Example Products
	Disposable Sterile Instruments (e.g., scalpel, forcep, cannula, catheters--temporary, trocar, scissors, etc.)	Rx drug products in any form factor (tablet, liquid, syringe, etc)	Implants, no power (heart valves, prostheses, joints, intraocular lenses, etc.).
IVD Reagents, Stains, Consumables, Containers, and Accessories (electrodes, etc) -whether in a Kit or standalone	IVD Reagents, Stains, Consumables, Containers, and Accessories (electrodes, etc) -whether in a Kit or standalone	Clinical drug products in any form factor (tablet, liquid, syringe, etc)	Re-processed instruments (chisels, clamps, forceps, scalpel handles, etc)
Therapeutic Nutrition medical device delivery systems	Therapeutic Nutrition medical device delivery systems	Controlled substance drug products in any form factor (tablet, liquid, syringe, etc)	Instrumentation with software (surgical laser, X-Ray machine, MRI machine, ventilator, defibrillator, etc.)
Blood Glucose test strips	Low-value general-use tubing sets (fluid delivery, aspirating, breathing, etc)	Vaccines in any form factor (tablet, liquid, syringe, etc)	Re-sterilized instruments (forceps, scalpel handles, clamps, etc)
Contact Lenses	Low-value surgical supplies (staples, sponges, sutures, etc.)	Biologics in any form factor (tablet, liquid, syringe, etc)	Implants, internal power and software (e.g. pacemakers)
Diaphragm for contraception	Surgical Procedure or Convenience Kits (disposable)	Therapeutic Nutrition products (excludes medical device portion, classified with 'Enhanced Level')	Surgical Kits with re-usable or re-sterilizable components, but without Drugs
	Surgical Probes, fiber optic lightpipes, etc.	Surgical Kits containing Serialized Drugs	Pregnancy test kits, electronic
	Surgical Mesh, Pins, Screws (permanent)		Blood glucose measuring device, electronic
	Blood Glucose test strips		Stents
	Contact Lenses		Infusion pumps
	Low energy direct current (DC) thermal ablation device		Hearing Aids, implanted or external
	Ophthalmic Viscoelastic Devices (OVD)		Laser surgery equipment
	Lubricants and jellies for surgical instruments		Electronic Monitors: EEG, EKG, blood pressure, blood oxygen level, etc
	Diaphragm for contraception		Catheter, Long-Term
			Diagnostic software, calculation software, etc.
